

Specialty Polymers and Roo Glue, Woodburn, OR

International Conference on Wood Adhesives, September 30 – October 2

About:

Specialty Polymers Inc., is a dynamic, family-owned manufacturer of water-based polymers and formulated adhesives. For more than 50 years Specialty Polymers has been leading the market with innovative polymers and responsive customer service.

Specialty Polymers' adhesive division, Roo Glue, has been formulating products based on the latest adhesive polymer technology for more than 25 years. All adhesive products are developed in house and are used for industrial wood applications as well as woodworkers and hobbyists.

Specialty Polymers and Roo Glue products are designed to meet the most demanding needs from customers around the world, and our employees are committed to providing the best customer service in the industry. Manufacturing and R&D facilities are located on the East and West coasts. With a fully equipped polymer synthesis, coatings applications, and wood glue testing lab Specialty Polymers and Roo Glue are ready to provide solutions for the customers large and small in the coatings and adhesives industries.

Tour Info:

Visitors to Specialty Polymers and Roo Glue will tour the manufacturing and R&D facilities located in Woodburn, Oregon and see reactors for emulsion polymerization, processing equipment, and blend tanks. The R&D component of the tour will show the company's lab facilities, including the QC, polymer synthesis, coatings and wood adhesive testing labs.
